

## **Team Assessment**

**GitHub Group Name: Group 20**

**Project Name: Menu Scout**

**Members: Nancy Emmanuel(100657804), Poojah Karunakaran  
(100618754 )**

### **Team Approach**

**Question 1: How well did the team members understand the problem?**

**The team understood the aim of the project, and the final vision for the project and were able to complete the project deliverables together.**

**Question 2: How are the project tasks achieved?**

**The project tasks were achieved by working together to delegate tasks to make efficient usage of time and resources.**

**Question 3: How did the team approach solving a problem?**

**The team approached solving a problem by going through the questions or deliverables together and sharing what we thought was needed to include in the solution.**

**Question 4: What approach was taken to solve the problem?**

**The team solved problems by first discussing the task at hand to ensure we fully understood the task, and then made a guideline for what to include in the solution. We then would work on the task utilizing platforms that allow for shared collaboration such as Google Docs.**

**Overall Comments on team approach: Our team's approach was very efficient and effective as we made sure to first understand the task at hand, before starting to work on it to ensure we completed it to the best of our ability. We were able to put an equal amount of effort into the required deliverables for the project.**

### **Team Coordination of Task Responsibilities**

**Question 1: How actively did team members take in interest and supported in terms of individual member responsibilities?**

**Team members displayed interest and took initiative to develop the project and complete all required deliverables to the best of their ability. Team members were able to refine all requirements, use cases, and more based on feedback received.**

**Question 2: How well did the completion of tasks require active interchanges and sharing of information among members?**

**The majority of tasks required consistent communication and sharing of resources among team members in order to ensure we were both contributing to the tasks, and completing them in a timely manner.**

**Question 3: How well did the assignment of tasks to individuals match their expertise?**

**The majority of tasks matched the individuals expertise and were able to complete them with high quality. We struggled to implement the Menu website's search functionality, but were able to ensure our requirements, use cases, and design were up to standard.**

**Question 4: How well did the team coordinate individual task assignments?**

**The team was able to coordinate individual task assignments with ease due to consistent communication well ahead of time, and utilizing shared platforms so both members could contribute to the tasks and make any changes or adjustments as required.**

**Overall Comments on team coordination of task responsibilities:**

**The team was able to contribute to tasks efficiently and work through any complications or errors faced during the development of the project. The team was able to effectively work on tasks and get assistance when needed from one another or the T.A.**
